Art Unit: 1773

1. The amendment filed 7/8/05 has been entered. Claims 18 and 24-36 have been canceled. New claims 38-44 have been added. Claims 1-17, 19-23 and 37-44 are pending in the application.
2. This application contains claims directed to the following patentably distinct species of the claimed invention:
3. Species I – Claims 1-17 and 19-23 – artificial turf layered foundation with cover layer, particulate layer and barrier.
4. Species II – Claim 37 – layered foundation with different impact dampening, no requirement for particulate layer
5. Species III – Claim 38 – layered foundation with particulate layer, cover layer but no barrier and no artificial turf
6. Species IV – Claim 39 – layered foundation with particulate layer and particulate-containing protective layer
7. Species V – Claims 40 – 44 – surfacing system with structure having two different regions of particulate layer depth/dampening

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, Claim 5 is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Art Unit: 1773

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Monique R. Jackson whose telephone number is 571-272-1508. The examiner can normally be reached on Mondays-Thursdays, 8:00AM-4:30PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Carol Chaney can be reached on 571-272-1284. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
